

BOLLORÉ LOGISTICS RECEIVES TAPA FSR A 2020 CERTIFICATION FOR ITS ROISSY CDG HUB

On 19 May 2021, Bolloré Logistics obtained the TAPA FSR A 2020 certification (Transported Asset Protection Association – Facility Security Requirements) for its Roissy CDG Hub. This certification, the most demanding available in terms of security, will strengthen the confidence of the Roissy CDG Hub's customers, in particular the major players in the pharmaceutical, luxury goods and defence sectors, as well as all exporters of sensitive or high-value products.

The TAPA FSR A certification is awarded to facilities that meet the highest standards of safety and is obtained following a rigorous audit by an independent certification body. In a market where the security of goods is a key concern, this internationally recognised certification ensures that Bolloré Logistics' Roissy warehouse meets all the requirements for protecting goods against theft and cargo diversion.

"Achieving the TAPA FSR A certification for our Hub demonstrates our commitment to providing our customers with the best security and protection conditions for their high-value goods such as luxury or high-tech products. It also illustrates Bolloré Logistics' desire to actively pursue excellence," said Pascal le Guevel, Director of the Bolloré Logistics Hub at Roissy CDG.

"The site and building, already highly secure and compliant with AEO (Customs and Security/Safety) requirements for air cargo security as an Authorised Agent, have been given additional security features, including enhanced video surveillance systems and improved processes and equipment to protect sensitive, high-value products," said Nicholas Gilbert, Head of Security France at Bolloré Logistics.

About Bolloré Logistics

Bolloré Logistics is a major international supply chain operator and ranks among the world's top ten transport and logistics groups with an integrated network of 600 agencies in 109 countries. Placing customers at the heart of its strategy, Bolloré Logistics is committed to designing innovative, robust and agile solutions. Through the reliable management of the entire supply chain, the company has developed a high level of resilience enabling it to control risks by securing transport plans through alternative options and to lead a continuous improvement policy over the long term while acting as an ethical and responsible player.
