

## **BOLLORÉ LOGISTICS BELGIUM MOVES INTO NEW OFFICES IN ANTWERP**

Bolloré Logistics Belgium opens its new Head Office in the centre of Antwerp. This strategic choice will allow Bolloré Logistics to strengthen its presence in this city, home to the second largest port in Europe, while continuing to offer quality service to its customers. This is a logical development for Bolloré Logistics Belgium, confirming both its ambition and its determination to strengthen its position on the market.

This new site is extremely well located and has within its remit the Brussels and Liege airport branches. Specialising in maritime operations management, it provides professional services for all current requirements in the field of transport and logistics.

The location of the new offices is particularly advantageous, given commuting issues for staff. The close proximity of train, bus, and tram services, as well as a multitude of cycle path connections, offer staff viable alternatives to travelling by car. The inside of the building has also been designed to provide modern working conditions in line with the new concepts of professional working achievement.

*"Located in the immediate vicinity of public transport, our new premises offer high-quality facilities along with a 360° panoramic view, reflecting our commitment to providing a collective, pleasant and functional working environment for all our employees. Its strategic location will also facilitate the management of import and export operations to meet the requests of all our customers."* says Dirk Jacobs, CEO of Bolloré Logistics Belgium.

### **About Bolloré Logistics Belgium**

Present in Belgium since 1997, Bolloré Logistics Belgium handles nearly 14 000 T (airfreight) et 50 000 TEUs annually. Three agencies spread geographically (Antwerp, Brussels and Liege) are fully functional thanks to a workforce of 148 Belgium employees. The company continues to invest to be able to provide tailor-made logistics solutions for multimodal transport, customs clearance, warehousing and inventory management, as well as industrial project logistics.
